- Applicant is responsible for providing the correct "Connector Type" for the desired from the tables above. See diagrams for approved "connector types."
- Connector Type #1 = standard polarized 3-spade 120-volt single-phase connector for use on 120 volt services of 15 amps or less.

- Connector Type #2 = standard 120/208 volt connector that is to be used for all 120 volt single phase and 120/208 volt three phase services of 1-30 amps. Connector Type is #L2130. Single Phase 120-volt: Connect the "hot leg" [black] to "X" spade: connect neutral [white] to neutral spade: connect ground [green] to ground spade.

Single Phase 120/208- volt: Connect "hot leg" [black] to "X" spade, connect "hot leg" [red] to "Z" spade, connect neutral [white] to neutral spade, connect ground [green] to ground spade. Three Phase 120/208 volt: Connect "hot leg"[black] to "X" spade, connect "hot leg" [red] to "Z" spade, connect "hot leg" [blue] to "Y" spade, connect neutral [white] to neutral spade, connect ground [green] to ground spade.

- Connector Type #3 = special connection for all services greater then 30 amps. Our "staff electrician" will make connections. Upon arrival to the event, check in with management staff to secure a time for the electrician to install your service.
